The Survey of Buying Power Data Service is a copyrighted publication of Sales & Marketing Management magazine. Reproduction in any form of the data contained herein is strictly forbidden. Permission to reproduce all or any part of the data in this Data Service may be obtained only upon written request to Sales & Marketing Management, specifying the intended use. Such permission, if granted, may be revoked at any time without notice. The copyrighted data include the estimates of population, households, Effective Buying Income, retail sales, Merchandise Line Sales, Buying Power Index, graduated Buying Power Indexes, and all other indexes, percents, and percent changes.

How To Use S&MM's

SURVEY OF BUYING POWER

DATA SERVICE

WHY THE **DATA SERVICE** IS A VALUABLE TOOL FOR YOU

In the business climate of America today, the **SBP DATA SERVICE** has become a more essential and productive marketing and sales tool than ever before. For, as perhaps, the most complete collection of marketing statistics published, the DATA SERVICE is used by more and more businessmen in an almost infinite variety of ways. Combined with internal company records, it has become a widely acclaimed sales and marketing tool of extraordinary versatility and value.

The act of ordering and using the **DATA SERVICE** is a clear indication of your awareness that today's new business challenges must be met by utilizing more objectively developed marketing strategies and a new range of productive disciplines; those that parallel what is going on *now*.

WHAT'S IN THE **DATA SERVICE**

The Survey of Buying Power **DATA SERVICE** consists of over 900 pages of maps and figures divided into three volumes.

It includes state and county outline maps, population and detailed characteristics, the household income distribution, Effective Buying Income, total retail sales and four Buying Power Index series.

It covers retail sales by twelve individual Store Groups and ten Merchandise Line categories for both the current year and the 1977 Economic Census. Comparisons and growth rates can be evaluated.

It also presents TV market data and metropolitan and county market projections, for Population, Effective Buying Income and retail sales.

HOW THE INFORMATION IN THE **DATA SERVICE** IS ORGANIZED

The information is organized, for the most part, within a geographic hierarchy; by region, state, metropolitan area and county and by TV market (ADI: Area of Dominant Influence). Summaries are also presented.

For each geographic area, you will find: information dealing with the area's total population, its percentage of the U.S. total, break-outs by age, sex, number of households, number of persons in household, etc.

In addition, counties, metropolitan markets and TV markets are ranked by key population designations. That means, for example, if a population characteristic or combination of characteristics is especially relevant to the sale of your product, you can isolate and rank those geographic areas in which the densest concentration of such characteristics exist.

DEFINITIONS OF THE MOST COMMONLY USED DESCRIPTIVE CATEGORIES

Buying Power Index

For each geographic area, the **DATA SERVICE** presents four Buying Power Indexes.

This term, first used in the Survey of Buying Power in 1948 is widely used and accepted by businessmen today. Simply put, a Buying Power Index (BPI) is a measure of a given market's ability to buy, and is expressed as a percentage of the total U.S. potential (100%). A market can be a state, region, county, metropolitan market or TV coverage area (ADI).

The basic BPI is created by weighting and combining three significant factors that exist in every market and determine its ability to buy; total population, total income, and total retail sales. Thus, the BPI is a percentage (not an index number) representing the share of buying potential in a specific market as related to the U.S. potential as a whole. It is a combination of the numbers of people who can purchase the product or service; their ability to pay for it and their access to outlets where the transaction can be made. Logical, simple, concise.

Graduated Buying Power Indexes

Take the BPI concept one step further. The Graduated BPI's correlate product potential and buying power in households with low incomes (under $15,000), moderate income ($15,000-$34,999), or high income ($35,000 and over). In this manner, more finite BPI's can be determined by relating to the price point of a product (EPP, Economy-priced product; MPP, moderate-priced product, and PPP, premium priced product).

YOUR OWN CUSTOM BPI

Using the Index to the **DATA SERVICE** enables you to select those factors which reflect a market's ability to purchase your specific product or service. To begin, you must be able to define the consumer profile for your product. Three factors are most often essential:

Factor A = demographic
Factor B = economic
Factor C = distribution

For example, you must determine the population or household factor that best describes your particular consumer. If your product is bicycles, 6-17 year olds might well be your target demographic subgroup. If your product is single portion convenience foods, one person households might well be your target factor.

The next step is to select the household income group or groups best suited for your product. If it's a premium-price product, you might focus in on households with incomes over $25,000.

The third step is to select the retail outlet or product group category that parallels your known channels of distribution. Food stores are the appropriate distribution channel for grocery items. However, if your product has widespread and perhaps multiple distribution possibilities, a Merchandise Line rather than a store category might well be more appropriate. TV sets, for example, would be such a case.

Once these three factors have been selected, the process for computing your own BPI is as follows:

Step 1: for market (region, state SMSA or county) for which a BPI is necessary; (example single portion foods)

Factor A (demographic) = $\frac{\text{Market's 1 person households}}{\text{U.S. 1 person households}} = X\%$

Factor B (economic) =
$\frac{\text{Market's HH with income \$25,000+}}{\text{U.S. HH with income \$25,000+}} = Y\%$

Factor C (distribution) = $\frac{\text{Market's grocery store sales}}{\text{U.S. Grocery store sales}} = Z\%$

Step 2: Determine the importance of each factor:

As an example, when dealing with single portion foods, the weighting might be as follows:

Factor A = 50%
Factor B = 20%
Factor C = 30%

Step 3: Calculate the BPI

BPI = .5(factor A) + .2(Factor B) + .3(Factor C)

Step 4: Repeat for each next market.

Of course, some BPIs are more complex than others. However, the same principals apply whether one, two, three, four or more factors are used in the construction of a custom BPI. The **DATA SERVICE** offers a wide choice of all factors for BPI input. Choose carefully and you will end up with a valuable and objectively functional sales and marketing tool.

EFFECTIVE BUYING INCOME

Effective Buying Income (EBI) is disposable personal income: that amount of gross income available after taxes, to purchase goods and services. The Effective Buying Income household distribution groups households into income classifications and geographic market detail. All are included in the **DATA SERVICE.**

RETAIL SALES

Within these same geographic market areas, information and rankings also exist for Retail Sales, covering nine basic retail store groups: food stores, eating and drinking places, general merchandise stores, apparel and accessories stores, furniture/home furnishings/appliance stores, automotive dealers, gasoline service stations, building and hardware dealers.

MERCHANDISE LINE CATEGORIES

Merchandise Line Sales data reflect product sales rather than store sales. Merchandise Line categories include groceries and other foods, drugs and other health aids, furniture and sleep equipment, major household appliances, televisions, audio equipment, men's and boys' clothing, women's and girls' clothing, footwear and toiletries. In many cases these measurements provide more specific estimates of product potential than is provided by store type sales alone.

THE PURPOSE OF THIS GUIDE

Because the **DATA SERVICE** is an analytical tool, its value is directly related to your understanding of its capacity to provide answers to problems.

The function of this GUIDE is to help you take advantage of what is in the 900 plus page **DATA SERVICE;** to enable you to relate your own special problems to the solutions that are to be found within its pages. And to provide you with simple effective procedures for cutting through its mass to develop and use the valuable answers it contains.

HOW THE GUIDE IS ORGANIZED

For clarity's sake, this GUIDE is divided into three sections: Sales, Marketing, and Advertising. Each section offers an almost limitless source of applications which can be extended from the simple examples cited. We suggest that the most efficient method for using your copy of the **DATA SERVICE** is to find your area of interest, or, the category in which your question/subject falls, and then follow the designated procedures that allow you to generate the information and answers you require.

Section One: SALES
- **a.** Measuring Sales Performance
- **b.** Setting Sales Goals
- **c.** Setting Sales Quotas
- **d.** Territory Alignment/Realignment

Section Two: MARKETING
- **a.** Measuring Market Potential
- **b.** Developing Marketing Strategies & Determining Distribution Channels
- **c.** Evaluating New Product Potential
- **d.** Long Range Planning

Section Three: ADVERTISING
- **a.** Test Market Selection
- **b.** Co-op Advertising Allocations
- **c.** Media Selection
- **d.** Media Allocation

SALES PLANNING APPLICATIONS

A–MEASURING SALES PERFORMANCE

How do you determine just how well any salesperson is doing? Is a salesperson who generates a 20% increase doing a better job than another salesperson who may have only achieved last year's sales level?

An objective measure is required. Because, unless you know what your sales force could be doing, you'll never know how well they've done.

It has often been demonstrated that consumers, with similar demographic and economic profiles and like access to distribution, will normally buy the same quality and quantity of product. Thus, the most basic measure of sales performance in the **DATA SERVICE** is the use of one of the four BPIs, adapting the closest fit to the known demographic elements of your product.

If your product is shoes, sold to people earning $10,00 to $19,000 household income, then your basic BPI would be the Graduated Buying Power Index MPP (Moderate Priced Products).

NEW YORK - NEWARK - JERSEY CITY - BRIDGEPORT CONSOLIDATED AREA	***16,558.4***	***7.2466***	***–5.4***	***3,146***	***74.8***	***6,028.6***	***7.3607***	***155,915,773***	***8.5943***	***64,611,379***	***6.6904***	***7.7535***	***6.5391***	***6.6893***	***8.6346***

You would be on safe ground to take your yearly sales of shoes, one million pairs for this example, and multiply that by the MPP/BPI for New York, .039886. For New York, your sales measurement would be 39,886 pairs of shoes.

You can break this out further by the various counties that make up the New York market, showing you geography that should be doing better and areas where your sales volume is terrific. By creating a Performance Index for the market you could determine your successes and shortcomings.

Again, using our example of shoes, let's add the fact that we sold 50,000 pairs last year. To find the Performance Index (PI) you compute:

$$PI = \frac{\text{Actual Sales}}{\text{Expected Sales}} \qquad PI = \frac{50{,}000}{39{,}886} \qquad PI = 125$$

In this particular case, since the PI is greater than 100 it indicates that performance exceeds the assigned market area share of sales. When a PI is less than 100 it indicates room for improvement.

Specialized Products

Your product may be more complicated than a basic pair of shoes. It could be "Running Shoes", with known demographics of being sold principally to men 18-24 years old, living in households with income of over $25,000 and having access to department stores.

You would then follow the definition of constructing a Custom BPI, to give you a carefully constructed measure for your particular product.

B–SETTING SALES GOALS

If you have found a good "fit" BPI in the **DATA SERVICE**, as we did in the example of shoes in measuring sales performance, then there is no reason why you should not consider using that BPI to set sales goals for your salesforce.

Using the shoe example again, if your company plans to increase its production and you now have to sell 10% more shoes, to 1,100,000 pairs, don't take New York's actual sales and increase it by 10%. Remember, that territory indexed above 100.

Take the BPI .039886, multiply that times your new sales target of 1,100,000 and you will find that New York's sales goal will be 43,875.

Since they had previously sold 50,000 pair, you now know that meeting last year's actual performance will almost meet what they must do this coming year. This leaves you free to concentrate on other areas where this fortunate situation will not exist. Increasing New York's target penalizes that sales force for doing a good job.

Conversely, let's take a different product with totally different problems.

For this example, you are selling sheets. From years of experience, you and your company know that young adults buy proportionately more sheets than old adults.

Additionally, throughout the country, there are areas where the population mix is far from normal. A typical example of this type of problem shows up in Arizona.

POPULATION BY AGE AND SEX

ESTIMATES METRO AREA County	12/31/80 Total Population (Thousands)	Sex	Population By Sex	Population by Age and Sex: 0-5 Years	6-11 Years	12-17 Years	18-24 Years	25-34 Years	35-44 Years	45-54 Years	55-64 Years	65 & Over	Median Age By Sex

Yavapai county, with a relatively good sized population, averages almost 39 years of age. Apache county, while almost the same size in population, averages closer to 19 years of age. And, the BPI information in the DATA SERVICE gives Yavapai almost a two to one edge across the board over Apache county.

In the example of sheets the solution will be to construct a custom BPI, getting the additional data needed from the retail sales by store group (sheets are part of home furnishings) and then adding the weights to each of the three factors based on your company experience.

1979 RETAIL SALES BY STORE GROUP—WITH 1977 CENSUS DATA

ESTIMATES 1979 U.S. CENSUS 1977 METRO AREA County	Year	Total Retail Sales ($000)	Food Stores		Eatng & Drinking Places	General Merchandise Stores		Apparel & Accessories Stores	Furniture/ Home Furnishings/ Appliance Stores		Automotive Dealers	Gasoline Service Stations	Bldg. C–SETTING SALES QUOTAS

Salespeople must feel justly compensated for their work. The quotas set for them must be both realistic and achievable. That combination is the source of true motivation. And, in order to reach it, a company must construct a quota that assigns a fair share of total volume to each salesperson.

What is such a fair quota? It must cover both the reality of its being accomplished as well as the possibility of special regards for truly superior performance.

But fair does not mean equal. Actually, no two organizations confront the same challenges or problems. Through the use of the **DATA SERVICE**, you can develop a quota setting system that has been widely used by a large number of organizations. But, you should redefine the system to your special needs. It is intentionally simple and affords sales management people the ability to acknowledge and consider any special circumstances which may be unique to their own company.

First of all, assume that a fair quota is an achievable one. Secondly, such a fair quota must consider the individual salesperson. In other words, you must evaluate past performance as part of the construction of a fair quota. Also, this same fair quota reflects the amount of the product or service that your company management believes can be sold in each territory. In short, a quota system that incorporates both experience and potential is one that can be a fair quota system.

Let's use as an example a raincoat manufacturer that has a national sales goal of 500,000 units. According to its own custom BPI, Boston has a BPI of 2.4863, so we can expect 12,315 units to be sold there.

But, based on past performance, Boston has a historical index of 122, showing that it is already doing more than its share. In reviewing the territory we find that it includes Brockton with no sales (but a BPI of .3577) and New Bedford/Fall River/Taunton (with a BPI of .2924). There is also a non-metro portion with a BPI of .1432. The salesperson total BPI is in fact 3.8957 and the current performance index is in fact 94.

Setting a sales goal for the "Boston" territory meant looking into the total territory, not just the big city, big performance.

Setting Sales Quotas means assigning each part of a territory its rightful fair share of the national effort. When the territory index is far from par, or 100, then it must be brought up to proper index performance on a planned yearly increase basis that is achievable. To expect it all to happen in one year might become counter-productive.

D–TERRITORY ALIGNMENT/REALIGNMENT

Sales territories are too often designated by historical situations rather than objective sales potential or performance.

Through the use of the **DATA SERVICE**, sales management is afforded an objective process through which true territory alignment

needs can be identified and met.

The first step is to use the BPI method of measuring territories for basic sales potential. Ideally, all territories should have approximately the same BPI, be it regular, graduated or custom.

Company sales management will know if there is a major buying office in one specific territory and that fact then has to be put into the BPI equation for that territory and its surrounding territories.

As an example, you are the sales manager for a new product line of an existing company. The line is men's clothing for a company that formerly was limited exclusively to women's clothing.

You have no salesforce, so you must start from scratch, establishing all territories. Your initial budget allows you to hire ten salespersons. You are to decide where the territories should be.

The **DATA SERVICE** ranks all Men's and Boys Clothing Sales by metro markets in declining retail volume. Thus, you can identify the top markets for your initial effort.

Since your salesforce will be a commission paid group, you can determine potential earnings that you wish your salesforce to earn. Then, creating a custom BPI for your product, you can identify the size of the market you wish covered by each initial salesperson. By doing this you eliminate the necessity for undue "cutting" of territories at a later date and you also get the maximum effort out of each salesperson as they concentrate their efforts in an achievable, workable territory that has been planned efficiently for a worthwhile income.

MARKETING APPLICATIONS

A–MEASURING MARKET POTENTIAL

The first thing a company can do in order to fully utilize the **DATA SERVICE** is to identify all of its markets in a manner consistent and compatible with the definitions found in the **DATA SERVICE**.

Markets can therefore be identified by U.S. Census Bureau Regions, by states, by SMSAs, SMSA consolidated areas, by TV (ADI) Markets or even by counties (counties can be grouped into sales territories).

Company sales records should also be structured in such a way as to provide information that can be used for measuring potential. In other words, your internal data reporting must conform to the above geographic segments.

When such information is readily available the DATA SERVICE can be used to:

1. Identify a given geographic segment.
2. Identify the industry product sales for that segment. This is achieved by multiplying a custom BPI by the total product sales of the industry in the entire U.S.
3. Identify your sales in that segment.
4. Find the Brand Share in that market by dividing item #2 by item #3.
5. Identify the brand potential for a particular market by multiplying your total sales by the market BPI. Then divide your actual market sales by that potential number, and the result will be an index of your market performance. An index of 100 is par. Above 100 indicates that the market is performing above its basic potential. Under 100 means that the performance is under basic potential. In other words, an index of 80 would mean the market is 20% under potential.

Let's construct an example to see just how this would work:

The assumptions: You manufacture men's dress shirts. Retail volume for the total U.S. is two billion dollars. Your company does $140 million or 7% market share in dollar volume.

In Bangor, Maine, your sales are $94,200. The custom BPI for that market is .0530. The first thing to do is to find out what would be the total estimated industry sales for Bangor. Two billion dollars multiplied by the custom BPI (.0530) = $1,060,000. Your basic potential in that market is your total sales ($140 million) multiplied by the custom BPI (.0530) = $74,200. The final step would be to construct a performance index by taking the actual sales ($94,200) divided by the potential sales ($74,200) = 127 index or 27% better than the estimated potential. The actual sales yield a 9% market share.

In Boston, with a custom BPI of 1.9134 and total sales of $2,678,760, the same mathematics indicate a 7% market share and an index of 100.

In Syracuse, with a custom BPI of .2609 and actual sales of $295,000, only a 6% market share was achieved and an index of 81, or 19% less than potential.

B–DEVELOPING MARKETING STRATEGIES AND CHANNELS OF DISTRIBUTION

As a manufacturer of medium priced Single Lens Reflex Cameras, let us assume we have defined our purchasers as follows:

Male, 25-34, Household Income over $25,000, HH of 2-3 size.

However, because our camera, a breakthrough SLR, is priced remarkably low and is exceedingly simple to operate and maintain, and is distributed through camera stores and department stores.

We have found in test markets that our particular SLR camera sells with equal strength through department stores. Whereas at one time we made access to camera stores a mandatory element in the special BPI we constructed, it is now time to reevaluate and re-examine our strategy as a result of a natural change in distribution.

Now, in setting our sales goals, we will search out the key concentrations of 25-34 year old males, in 2 or 3 person households, where the household income is over $25,000.

Preliminary examination reveals that while our dependency on camera stores has made it necessary for our company to advertise on a national basis, that may no longer be necessary. We have decided to use our new BPI and rank the ADI markets for TV by our new BPI.

Here is what we discover:

	ADI	1980 BPI		ADI	1980 BPI
1	New York	11.92	6	Detroit	3.20
2	Los Angeles	7.08	7	Washington DC	3.19
3	Chicago	5.95	8	Boston	2.49
4	San Francisco	4.36	9	Houston	2.36
5	Philadelphia	4.11	10	Dallas/Ft. Worth	2.07
				Top 10 markets	**46.73**

By adding the next 10 markets we find that we end up with 60.88%

of all the people we want to reach living in the top 20 markets.

Our advertising for these cameras can now concentrate its weight proportionately among the country's top TV markets for our product. We know that we are targeted to sell 100,000 SLR cameras this year, so that we can identify all of our sales in these top twenty markets through the use of the relevant custom BPI share of the total target we plan to sell.

Finally, we checked the ADI rankings of retail sales by stores groups to find out how department stores were ranked compared to the way our custom BPI ranked our sales. We also confirmed our plan by checking the television market rankings for population, EBI, total retail sales and BPI for the top 20 markets.

C–EVALUATING NEW PRODUCT POTENTIAL

Your firm has created a new product; one specifically identified as having special potential among consumers in the lower income categories, compared to your present product. The DATA SERVICE enables you to configure a strategy that identifies the highest concentration of your most important potential customers.

Once the demographic prerequisites have been identified, you can then assign specific goals to sales personnel in pre-selected sales areas that encompass the highest concentration of potential customers with the characteristics you seek. And you will be able to establish, with solid objectivity, maximum sales goals in these special market areas, knowing in advance that they represent an optimum concentration of the best potential customers for your new product.

If part of the new product potential evaluation includes a controlled market test, this same technique allows you to identify areas that are identical to your perception of the product/key consumer relationship. You can therefore implement such control testing in additional structured markets that meet your requirements. You will be able to compare both the results of your market/product associations at the end of the test period. If you have used the objective information with the DATA SERVICE the results will be accurate and projectable.

Your present product is a fine quality raincoat. Your new product is a "knock-off" of your present product, but at a very popular price. It is built to appeal to males, the same age group as your present product, but with lower household incomes.

Unlike other examples the first thing you must do is rely on your own internal data to identify those markets where raincoats as a category, sell best. While Los Angeles may be one of the largest markets in the US, they don't wear many raincoats in LA. Your own sales history will let you know which markets are best for the category.

The **DATA SERVICE** will then allow you to compare market data on the potential consumer for your product, on a market by market basis. If New York is your top raincoat market for a top quality product, sold to individuals with $25,000 and up household incomes, then your market will be vastly larger when you approach males in the $15,000 and up HH incomes. And, the data service will identify specifically where, by county, your potential customers might be found thus allowing you to plan your sales approach based on where the potential consumers live.

D–LONG RANGE PLANNING, MARKETING STRATEGY

In most companies, there is always a need for accurate long range planning accompanied by true accountability. Wherever such planning is possible, it should be implemented; to balance the short-term pressure for profitability that can sometimes jeopardize or diminish long-term achievements.

The forecast section of the **DATA SERVICE** identifies a wide range of five-year projections with uncanny accuracy.

Thus, a marketer can determine where his company is today and where and how he can help it achieve its objectives five years from now; through constant periodic examinations of its performance in the quest for its goals, and by using objective data to implement any required modifications in its overall marketing plans.

As an example, you now sell one out of every 100 people, your fabulous cookies. Your total market is one million people, so you can anticipate sales of 10,000 cookies within that universe.

The forecast section of the **DATA SERVICE** might identify this particular market as one that will lose 5% of its population within the next five years. That means as the market shrinks to 950,000 people, your sales will automatically drop to 9500. Unless, of course, you design a program with the objective of increasing your market share of that market to compensate for the projected loss in sales that will accompany the loss in population.

This same process might lead you to conclude that other companies, faced with the same problem in this market, will possibly consider intensifying competitive activity within that same market.

You might also consider broadening and expanding the reach and saleability of the product into other possible markets as the population declines.

On the other hand, the forecast section might indicate a population decline accompanied by an increase in income levels greater than the national rate of increase. Thus, the "quality" of this market would increase, while the quantity decreased. If your cookies can be related to higher income response, then you can plan on achieving higher sales by anticipating forecasted changes and tailoring a strategy that turns such changes to your corporate advantage.

ADVERTISING

A–TEST MARKET SELECTION

One of the most important uses of the **DATA SERVICE** can be found in its use as a source for selecting test market areas. There is a normal tendency to use "test markets" that have been used before, or markets famous as "test" markets.

With the **DATA SERVICE,** through the use of the demographic, economic and sales information, markets that are similar can be easily identified for a wide range of test marketing purposes.

You can identify such similarities in markets as size of population, age of that population, number of households within the market, age, sex and number of persons in households as well as by household income levels. Thus, the following examples:

By population	San Antonio	1,048,000
	Columbus, Ohio	1,110,200
	Hartford, New Britain, Bristol	1,053,100
	New Orleans	1,163,800

Market similarities can also be determined by such specialized measurements as median household Effective Buying Income (EBI) or per capita EBI or BPI, graduated, custom or general. Under this magnifying glass, our four examples would look like this:

	Average Household EBI	BPI	EPP/BPI	MPP/BPI	PPP/BPI
San Antonio	20,812	.4424	.4364	.4537	.4184
Columbus	21,827	.5227	.4477	.5126	.5114
Hartford	22,795	.4844	.3701	.4539	.5193
New Orleans	21,769	.5339	.5535	.4852	.5757

Whereas on population, San Antonio and Hartford/New Britain/Bristol were almost exact fits, as were Columbus and New Orleans, looked at under this new table San Antonio and Hartford are no longer such a close fit under the average Household EBI attitude. Nor could they be matched up realistically to test economy priced products. In other words, each market can be clearly identified as to differences and similarities by constructing the proper data tables from the DATA SERVICE.

Additionally, markets can also be matched through the use of Retail Sales data by store groups, or even through an examination of Merchandise Line Category sales patterns. The use of this data is indicated when raw population numbers are not necessarily relevant to the sales growth of your product. By examining and using the appropriate clusters of sales figure data, you can match up virtually all metro areas, for example, that sell approximately the same amount of any given product or group of products.

	Per Household Retail Sales	Grocery	Drugs	Footwear
San Antonio	$11,943	$766,265	$ 66,626	$ 69,878
Columbus	11,949	833,373	112,669	73,229
Hartford	10,561	806,695	91,168	57,103
New Orleans	11,615	890,761	122,715	101,892

(Note: $000 omitted on all above figures)

Again, it becomes very clear that there are major differences with these four cities that would preclude them from being similar test markets for all products.

Remember, we have established that a combination of known demographic, economic, and sales data determines sales potential, regardless of geographic area of residence. That means that you can construct a wide variety of test market universes by focusing in on the specific characteristics that affect the rate of sale of your product.

In effect, you are no longer limited to choosing your own test market from anyone else's list of the best ten test markets. As a result, you probably won't be running into secret competitive testing activity that could well skew results and require re-evaluation (assuming that you're fortunate enough to learn that such factors were affecting the results of your test).

By knowing with objective certainty the combination of characteristics available in the **DATA SERVICE** that affect your product sales, you can create your own test markets. With maximum control, projectability and dollar efficiency. Because, when you come right down to it, there really is no "average" product any more than there is a perfectly "average" test market, unless, of course, you're the first one on your block to discover such a pearl. But, if you're one of a long line of users for any test market, consider that inordinate testing could eventually destroy the natural responsiveness of the market that made it valuable as a testing location in the first place.

B–CO-OP ADVERTISING ALLOCATION

First, a definition. Co-op advertising is not determined by the media in which dollars are spent. Rather, the designation is related to the source of the monies.

One of the biggest problems in the preparation of co-op advertising budgets is trying to define and plan on the approximate dollar amounts that should be legitimately anticipated for these special and important advertising expenditures.

The main source of this dilemma is that most co-op advertising allocations are based on after-the-fact sales volume, with a percentage of total sales allocated for the co-op advertising program.

Once again, the **DATA SERVICE** can be used to identify sales potential by market area on an objective base. It then becomes possible to allocate the designated co-op dollar expenditures to help generate the objectively projected sales quota, on a market by market basis. In effect, you can use these all-important dollars to help you generate the projected sales, rather than as a payment to retailers who have already made their buying commitments.

You manufacture a stereo component which happens to sell, on the average, one unit for each 100 males between the ages of 25 to 34. In Michigan, last year, you only sold 3,050 units, even though the potential population of 621,427 males in that age bracket could have given you sales of 6,214 units. Each unit averages $50 so that your actual accrual of co-op funds, based on your 5% co-op program, was $7,625.

Based on the market potential you should have done $310,700 (6,214 x $50) and the 5% accrual would have generated $15,535. By planning the program based on potential you could put together a program that would help the salesmen generate the expected sales volume.

Through the use of the custom BPI process, for example, you can use your anticipated national sales volume, to identify the proper share of that volume that should be generated by all target markets or groups of markets, and then apply the proper co-op advertising percentage to those markets to help achieve that potential sales volume.

C–MEDIA ALLOCATION

Many consumer goods manufacturing companies purchase network, local or spot TV, radio, magazine, or newspaper advertising. Efficiency is achieved by reaching the most people for the least expenditure. This works well when the distribution for the product is widespread and if the product appeals to a "mass" audience.

If the product is a specialty item, a national advertising program which does not reflect differences in market potential will deliver audiences, not customers. Ranking tables designed to flag key markets will be provided to allow for quick determination of best buys.

The Buying Power Index is the ideal tool for allocating limited advertising budgets into individual markets. If a TV market has a 6 percent of a firm's potential, it should consider spending 6 percent of its budget in that market.

There are exceptions to the above general rule. The main such exception is when a part of the country is well developed, through many years of excellent sales representation, and other areas are still new to the company and in need of development.

In such case, based on ultimate potential, funds can be diverted from the established markets into the ones in need of such expansion.

In these cases two advertising funds should be formulated. The first to be a "sustaining" fund, designed to keep the business in those areas where sales have been well established. The second fund to be a "development" fund, designed to help the sales effort achieve the maximum potential of those markets that are under-developed.

In both cases clear goals of total sales will have been achieved in the sales plan before any advertising money is committed to any market.

D–MEDIA SELECTION

More and more major corporations are taking advantage of the strategic benefits that evolve from using advertising techniques that localize expenditures on a given market by market basis.

Through the use of the **DATA SERVICE** BPI you can now identify what any geographic segment within its over 900 pages should objectively generate in sales volume. That sales volume percentage or unit count in a market, converted into dollars by using the company advertising to sales ratio, enables you to relate what you can expect to generate in sales volume for the markets ad dollar investment.

Once a market's advertising dollar amount has been established, further use of the **DATA SERVICE** can identify the efficiencies of using various media (print, broadcast, etc.) against the cost per 1,000 exposure of that media against your target customers.

And, if your product has specific demographic configurations, you can adjust the basic cost per 1,000 to determine advertising efficiencies based not just on population, but rather on the concentration of the characteristics within that media coverage that represents prime prospects; age, income, households, etc.

In addition, using such data, and ranking markets with the greatest density of your key prospects, you will be able to determine such things as whether national coverage is truly more efficient than local coverage. If TV, for example, justifies its high cost on the basis of more general population exposure to your advertising message, you can compare such network coverage, for example, in the top 50 TV markets against identified consumer characteristics. In such cases you might find that these top 50 TV markets represent 75 to 80% of your total national potential and the additional network coverage is not justified because the supplemental exposure is against smaller markets where lack of concentration produces cost inefficiencies.

In other cases, depending on the product, when you know that you are trying to reach a given age group of a given sex, in a high income household, TV may become quite inefficient as a media for your message compared to the specialized magazine media that may be aimed directly at your identified consumer in that market.

Let us hear from you...

Most of the improvements and additions that appear in this new 1989 edition of the **Survey of Buying Power DATA SERVICE** are the direct result of the comments and suggestions we received from the subscribers to the previous editions.

Specifically, the listing of each county within a state in alpha order, the addition of Metropolitan Area rankings in broad range of vital categories and series of 51 county outline maps showing Metropolitan Areas for each state are all a direct result of your (or your colleagues') reaction to the past editions. As a result, the '89 edition is a more useful and usable marketing tool...and thus, more valuable to you.

The 1989 edition confirms Sales & Marketing Management's commitment to continuing its long history of providing the marketing and sales community with the information it needs to achieve greater sophistication and precision in analysis and planning.

If you have any questions, ideas or suggestions, please don't hesitate to write or call Market Statistics at (212) 986-4800.

1989 SURVEY OF BUYING POWER DATA SERVICE

DATA SERVICE 1989

Explanation of Terms

ALL OTHER STORES. The aggregate total of sales for all types of retail establishments not included among the store groups listed in the *Data Service*. The arithmetic difference between Total Retail Sales and the aggregate sales of the 9 major store types shown in the *Data Service* represents the sales of "All Other Stores." Such outlets include nonstore retailers (vending machines, for example), liquor stores, sporting goods dealers, hobby stores, book, gift, and stationery stores, luggage shops, florists, cigar stands, and news dealers and newsstands.

APPAREL & ACCESSORIES STORES (SIC Major Group 56). Establishments engaged primarily in selling new clothing and related articles. It is a broadly inclusive group, embracing—besides men's and women's clothing stores—custom tailors, tailor shops, corset and lingerie stores, furriers, millinery stores, hosiery shops, women's specialty stores, and shoe stores. However, apparel and accessories sales made in department and general merchandise stores are not included.

AUTOMOTIVE DEALERS (SIC Major Group 55, except Subgroup 554). Included are retail outlets selling cars—domestic and imported, new and used. Motorcycle dealers, household trailer dealers, boat dealers, and "other" automotive dealers (such as tire, battery, and accessory dealers and auto and home supply stores) round out the group. Dealers selling new or used commercial vehicles, motorized industrial equipment, mobile homes, or bicycles are not included.

AVERAGE HOUSEHOLD EFFECTIVE BUYING INCOME. Total Effective Buying Income (EBI) divided by the number of households. Often used as an indicator of market quality, but it can be misleading, particularly in areas where there is a disproportionate share of college, military, and other types of institutional population housed in group quarters not considered households. Because total EBI includes such income, a per household measure would credit households with income not properly theirs. (See also Median Household EBI.)

AVERAGE HOUSEHOLD SIZE. Total population divided by the number of households. Depending upon whether it is above or below the U.S. average, it is used as a rough indicator of the relative importance of family-type units or single-person units in a local area. However, the figure can be artificially high in those relatively few counties where there is a disproportionate share of college, military, and other types of institutional population. The people living in such group quarters are part of the population total, but their dwellings are not part of the household total.

BUILDING MATERIALS, HARDWARE DEALERS (SIC Major Group 52). This somewhat mixed group includes retail establishments whose main business is selling lumber, building materials, paint, glass, wallpaper, and basic hardware to the general public. This group formerly included farm equipment dealers. However, in the 1972 Census of Retail Trade those dealers and other retail outlets—including those selling primarily paint, glass, and wallpaper; electrical supplies; and plumbing, heating, and air conditioning, but not to the general public—were shifted by the Census Bureau to the wholesale trade sector. Other changes made in the 1972 Census of Retail Trade: Retail nurseries and lawn and garden supply stores, part of SIC Major Group 59 in the 1967 Census of Retail Trade, and mobile home dealers, part of SIC Major Group 55 in the 1967 census, were classified in this group in the 1972 census. The 1982 Census of Retail Trade is consistent with 1972 census.

BUYING POWER INDEX (BPI). A weighted index that converts three basic elements—population, Effective Buying Income, and retail sales—into a measurement of a market's ability to buy, and expresses it as a percentage of the U.S. potential. It is calculated by giving a weight of 5 to the market's percent of U.S. Effective Buying Income, 3 to its percent of U.S. retail sales, and 2 to its percent of U.S. population. The total of those weighted percents is then divided by 10 to arrive at the BPI.

The BPI is probably one of the *Survey of Buying Power*'s most widely used single market measures. Because it is broadly based, it is most useful in estimating the potential for mass products sold at popular prices. The further a product is removed from the mass market, the greater is the need for a BPI modified by more discriminating factors—income class, age, sex, etc. (See Graduated Buying Power Indexes.)

CONSOLIDATED METROPOLITAN AREA. (See Metropolitan Statistical Area).

COUNTY. The primary political administrative subdivision of a state, the county is widely used for marketing purposes for the following reasons: (1) The range of current available data below the state level is greatest at the county level. (2). Geographic boundaries are rarely altered. (3) Complete national coverage is achieved by adding all countries. (4) Sales & Marketing Management's 3,138 county units are manageable building blocks for alignment of sales territories. (5) County boundaries are readily identifiable.

For Louisiana, parishes are used in lieu of counties; for Alaska, ughs and census divisions. The District of Columbia is treated as a single county unit. In Virginia, all cities are by law independent of counties; hence, the S&MM *Dada Service* treats them as county units in themselves. The cities of Baltimore, MD., St. Louis, Mo., and Carson City, Nev., are also independent cities. The 1989 edition of the Data Service follows the country boundaries as defiend by the 1980 Census of Population with the exception of Valencia county, New Mexico, La Paz county, Arizona and Aleutians East, Alaska. As of the end of the year 1981, a portion of Valencia county became a new county named Cibola. Similarly, a portion of Yuma county, Arizona became a new county named La Paz. In 1988 a new county was created from parts of Dillingham and Aleutian Islands census areas in Alaska. The name of the new county is Aleutians East. Kobuk county Alaska is now called Northwest Arctic.

DENSITY. Population divided by the county's square miles of land area. A simple basis for relating population to a county's size. Thus two counties with the same population can have sharply divergent densities because of differences in land area size. The figure suffers because the land area will include railroad freight yards, wildlife preserves, industrial parks, and other nonresidential areas, resulting in a misleading density level.

DEPARTMENT STORES (SIC Subgroup 531). A department store is an establishment that employs 25 or more persons and has combined sales of soft goods and apparel totalling at least 20% of sales. Furthermore, the establishment must sell minimum amounts of (1) furniture, home furnishings, appliances, radios, and TV sets;

© COPYRIGHT, SALES & MARKETING MANAGEMENT MAGAZINE, 1989.
1989 SURVEY OF BUYING POWER DATA SERVICE

(2) a general line of apparel; (3) household linens and dry goods. So-called mass merchandisers and discount stores are included if they meet the above criteria. Department store sales are included in the General Merchandise Stores sales totals.

DRUGSTORES (SIC Subgroup 591). Includes both drugstores and proprietary stores. Drugstores fill and sell prescriptions; proprietary stores do not. Both sell drugs, proprietary medicines, and other health and first aid products. Both may sell a number of related lines—cosmetics, toiletries, candy, tobacco products, magazines, toys, etc.—and may operate a soda fountain or lunch counter.

EATING AND DRINKING PLACES (SIC Major Group 58). Includes establishments selling prepared food and drinks for consumption on or near the premises or for takeout, as well as lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption. Also included are caterers and in-plant food contractors, as well as leased eating and/or drinking concessions in theatres, hotels, amusement parks, etc. Restaurants and lunch counters operated by department stores are classified in SIC Major Group 53 (General Merchandise Group); those operated by hotels are classified in SIC Major Group 70 (Hotels), data for which do not appear in the *Data Service*.

EFFECTIVE BUYING INCOME (EBI) A classification developed exclusively by Sales & Marketing Management to distinguish it from other sources reporting income statistics, EBI is defined as personal income less personal tax and non-tax payments a number often referred to as "disposable" or "after-tax" income.

Generally speaking, EBI is a bulk measurement of market potential indicating the ability to buy, and it is essential for selecting, comparing, and grouping markets on this basis. For products that appeal to more specific income classes, marketers should examine data showing the Percentage of Households by EBI Group and the Buying Power Index (BPI).

Personal income is the aggregate of wages and salaries, other labor-related income (such as employer contributions to private pension funds), proprietor's income, rental income (which includes imputed rental income of owner-occupants of non-farm dwellings), dividends paid by corporations, interest income from all sources, and transfer payments (such as pensions and welfare assistance).

Deducted from this total are personal taxes (federal, state, and local), non-tax payments (fines, fees, penalties, etc.), and personal contributions to social insurance. According to U.S. government definitions, the resultant figure is commonly known as "disposable personal income."

NOTE: A major reclassification of Effective Buying Income has taken place for the first time in this issue of the Survey of Buying Power. In an effort to make EBI a more reliable and useful marketing tool, and also to more accurately reflect the actual cash income available to consumers, Market Statistics has excluded the following additional items from this year's definition of EBI:

1. Employer contributions to private pension funds, group life and health insurance funds, supplemental, unemployment insurance funds, and privately administered workers' compensation programs. This portion was formerly included under 'other labor-related income.'

2. Imputed personal interest income, which includes the imputed value of services (such as checking) provided by depository institutions, and income earned by life insurance carriers and private non-insured pension funds on the principal amounts contributed by policyholders and pension beneficiaries.

3. Imputed rental income of owner-occupied non-farm dwellings (the owner is considered as renting to himself).

The above changes amount to a reduction in total income at the national level of approximately 11%, although this figure will differ slightly from state to state. This change in total will also ultimately affect average household EBI, median household EBI, and per-capital EBI figures throughout this year's Survey of Buying Power.

Users of these variables should take these changes into account when comparing EBI figures from the 1989 Survey to those from previous years.

FOOD STORES (SIC Major Group 54). Establishments selling food primarily for home consumption. The definition embraces grocery stores, meat markets, fish markets, fruit and vegetable markets. Also included are candy, nut, and confectionery stores, dairy product stores, retail bakeries, and egg and poultry dealers. Although food store sales include revenue from sales of nongrocery items, they still are most useful in determining how much people spend for food products.

(See Supermarkets, sales of which are included in Food Stores totals.)

FURNITURE, HOME FURNISHINGS, AND APPLIANCE STORES (SIC Major Group 57). Stores selling goods used for furnishing the home, other than antiques and secondhand items. The principal subgroup, Furniture and Home Furnishings Stores, includes establishments carrying furniture, floor coverings, draperies, curtains, upholstery, bedding, housewares, and miscellaneous home furnishings. (See separate explanation of this subgroup.) The other subgroups contain household appliance stores (including those for small appliances such as sewing machines), radio-TV and audio-equipment stores, record shops, and musical instrument and sheet-music stores.

FURNITURE, HOME FURNISHINGS STORES (SIC Subgroup 571). A component of Furniture, Home Furnishings, and Appliance Stores category. Made up of furniture stores as well as floor covering stores, and drapery, curtain, and upholstery stores. Diversified furniture stores that also sell household appliances, phonographs, radios and TV sets, and floor coverings are in this group if their sales of furniture and sleep equipment exceed sales of all other merchandise. Establishments engaged primarily in repairing and reupholstering furniture are included in the *Census of Selected Services*; hence their data do not appear in the *Data Service*. Home furnishings sold house-to-house or by party-plan merchandising are not included in this category; hence their data are part of "All Other Stores."

GASOLINE SERVICE STATIONS (SIC Subgroup 554). Includes both "gas stations" and garages whose receipts come mostly from sales of gasoline and oil. Besides those main products, they also sell tires, batteries, and accessories.

GENERAL MERCHANDISE STORES (SIC Major Group 53). Includes department stores, limited-price variety stores ("5 & 10's"), general merchandise stores, and general stores. The Census Bureau excludes stores previously classified (prior to the 1963 Census of Business) as general merchandise stores if more than half their volume comes from food sales. Nonstore retailers (mail-order houses, vending machine operators, and direct-selling establishments) were removed from the General Merchandise Stores class in the 1974 *Survey of Buying Power*. Also removed were dry goods stores and sewing and needlework stores. (See also Department Stores.)

GRADUATED BUYING POWER INDEXES. Designed to correlate product potential and buying power of households with LOW income (under $15,000), MODERATE income ($15,000-$24,999), or HIGH income ($25,000 and over). EPP, for economy-priced products, has the following weights applied to the respective percents of U.S. totals: 6 for households with incomes under $15,000, 3 for food store sales, and 1 for number of households. MPP, for moderate-priced products, has the following weights: 6 for households with incomes $15,000-$24,999, 3 for total retail sales, and 1 for three- and four-person households. PPP, for premium-priced

© COPYRIGHT, SALES & MARKETING MANAGEMENT MAGAZINE, 1989.
1989 SURVEY OF BUYING POWER DATA SERVICE

products, has the following weights: 6 for households with incomes $25,000 and over, 3 for combined Apparel and Furniture-Household-Appliance store sales, and 1 for households with head 35-64 years old.

Each Index is calculated in the same manner as the more familiar Buying Power Index (BPI). That is, the market's share of the U.S. total of each indicator is multiplied by the given weight; the total of the weighted percents is then divided by 10. The reader can construct his own customized BPI if he has reliable data on the consumers of his product and if he includes one population indicator (prospects), one Effective Buying Income indicator (purchasing power), and one retail store indicator (distribution channel).

HOUSEHOLD. A household consists of all the people occupying a single housing unit under 1980 census rules—such as a house, an apartment, a group of rooms, or a single room. The members of a household need not be related, and a single person living alone in a housing unit is also counted as a household.

All persons who are not members of households are regarded as living in group quarters: institutions, college dormitories, military barracks, etc.

HOUSEHOLDER. The Data Service follows the 1980 census definition of householder. In accordance, a householder is the person who was reported in column 1 on the 1980 census questionnaire. This was to be the person or one of the persons in whose name the home was owned or rented. If there was no such person, any adult household member at least 15 years old who was not a roomer, boarder or paid employee was to be reported in this column.

HOUSEHOLDS BY AGE OF HOUSEHOLDER. Marketers often try to position their products or services against specific age groups. The *Data Service* breaks household total into six widely used age groups.

HOUSEHOLDS BY EFFECTIVE BUYING INCOME GROUPS. A household's available spending potential is also used by marketers who want to aim their products or services and advertising efforts at those most likely to buy. The *Data Service* breaks the household total into the eight most widely used income groups.

HOUSEHOLDS BY NUMBER OF PERSONS. A third household break that is used by marketers who seek more precise sales targets is size, or number of persons in the household. Theoretically, for instance, a large household will consume a mass staple at a faster rate than a small one, giving the marketer an insight into the expected repeat-purchase rate. The *Data Service* breaks the household total into the six most widely used size categories.

INDEPENDENT CITIES. Several cities in the U.S. that do not fall within official county boundaries are treated as independent entities by the Census Bureau. The *Data Service* lists those independent cities as county entities. Except for St. Louis, Mo., Baltimore, Md., and Carson City, Nev., which replaced Ormsby County, all independent cities are in the state of Virginia. These are Alexandria, Bedford, Bristol, Buena Vista, Charlottesville, Chesapeake, Clifton Forge, Colonial Heights, Covington, Danville, Emporia, Fairfax, Falls Church, Franklin, Fredericksburg, Galax, Hampton, Harrisonburg, Hopewell, Lexington, Lynchburg, Manassas, Manassas Park, Martinsville, Newport News, Norfolk, Norton, Petersburg, Poquoson, Portsmouth, Radford, Richmond, Roanoke, Salem, South Boston, Staunton, Suffolk, Virginia Beach, Waynesboro, Williamsburg, and Winchester.

MEDIAN AGE. A calculation that divides the age distribution of the population into two equal groups, with one-half of the population younger, and one-half older, than the median figure. A common misconception regards the median age as the level where the population is concentrated. The median age figure is helpful when comparing the relative youth or age of counties' respective populations.

MEDIAN HOUSEHOLD EFFECTIVE BUYING INCOME. This figure divides the income distribution into two equal parts. If all households in the country were lined up in order of income size, the household with the median income would have half the households in front of it and half behind it. (See Average Household Effective Buying Income.)

MERCHANDISE LINE SALES. These data show total sales of nine broad product categories, such as groceries and the other food products, footwear and so on. Merchandise line totals are becoming increasingly popular because they give a more realistic estimate of a product's area potential than is provided by store-type sales. The merchandise line totals are made even more useful by data that show the volume of individual product categories sold by the dominant store type for that product classification–for example, the dollar volume of groceries sold in food stores. The merchandise line estimates shown in the Data Service are based on the 1982 Census of Merchandise Line.

METROPOLITAN STATISTICAL AREA. A metropolitan statistical area is a geographic area with a large population nucleus together enable all Federal statistical agencies to use the same geographic definitions in the study of metropolitan characteristics. A complete review of all metropolitan area definitions takes place every ten years following completion of each decennial population census. The definitions appearing in this edition are based on commuting and other statistical results of the 1980 census. As part of the current revisions, the term "Standard Metropolitan Statistical Area" will no longer be used. Instead, the term "Metropolitan Statistical Area" will be used. These Metropolitan Statistical Areas (MSA's) are designated and defined following a set of standards prepared by the Federal Committee on MSA's, which advises the Office of Management and Budget (OMB) on metropolitan area definitions. Under 1980 standards, an area qualifies for recognition as an MSA in one of two ways: if there is a city of at least 50,000 people, *or* an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In addition to the county containing the main city, an MSA may also include additional counties which have close economic and social ties to the central county. MSA's are defined in terms of entire counties, except in the six New England states, where towns and cities are the units of definition. The Federal government's alternative, but unofficial, New England County Metropolitan Areas (NECMA's) are used by Sales and Marketing Management for those states. Based on the 1980 criteria established by OMB, Sales and Marketing Management defines the Wichita, Kansas metropolitan area as the summation of Butler and Sedgwick counties and the newly created Decatur, Ala., metropolitan area as being co-extensive with Morgan county.

Within an MSA of over 1 million people, some areas may qualify for separate recognition as Primary Metropolitan Statistical Areas (PMSA's). A PMSA demonstrates very strong internal economic and social links. If two or more PMSA's can be defined within an MSA, then this MSA is designed as a Consolidated Metropolitan Statistical Area (CMSA).

The S&MM Metro Market rankings are based on data for MSA's, PMSA's and NECMA's.

NEW ENGLAND COUNTY METROPOLITAN AREA (NECMA). The U.S. Office of Federal Statistical Policy and Standards defines these areas by applying to the New England counties the same criteria used in establishing Metropolitan Statistical Areas outside New England. While they are not as satisfactory as the New England MSAs in fulfilling the metropolitan concept (owing to the unique geographic characteristics of the region), they are more convenient for marketers who work with county units and are better suited to the

© COPYRIGHT, SALES & MARKETING MANAGEMENT MAGAZINE, 1989.
1989 SURVEY OF BUYING POWER DATA SERVICE

development of demographic estimates. The name of each NECMA is composed of the names of the MSA central cities that it contains.

NONSTORE RETAILERS (SIC Subgroup 596). Nonstore retailers include Mail Order Houses (SIC 5961), Merchandise Vending Operators (SIC 5962), and Direct (house-to-house) Selling Organizations (SIC 5963). The *Data Service* includes sales of nonstore retailers as part of "All Other Stores."

PER CAPITA EFFECTIVE BUYING INCOME. This is an arithmetic average obtained by dividing Total Effective Buying Income by Total Population. It measures the total spending power in relation to the number of people and is useful for comparing the relative level of income of different markets because it eliminates the impact of population size. However, because population is measured as of one date (Dec. 31), whereas EBI is measured as a flow over the calendar year, a significant change in population during the year can distort the per capita figure.

PERCENT CHANGE OF POPULATION. The percent change between Apr. 1, 1980, the date of the decennial population census, and Dec. 31, 1988. Thus when calculating annual rate of change, allowance must be made for the nine months between April 1 and Dec. 31 in the year 1988.

PERCENT OF U.S. A market's share of the total U.S. population, households, Effective Buying Income, or retail sales. Besides being the central factor in the construction of the Buying Power Index (BPI), it shows the relative importance of the county's specific demographic or socioeconomic factors.

POPULATION. Updated from the Census Bureau's 1980 Census of Population and Housing, it is a head-count estimate of all the people living in an area at the end of the year. It includes people living in colleges and hospitals, and armed forces permanently assigned to the area, but excludes tourists and transients.

POPULATION BY AGE AND SEX. Male and female population totals for eight age groups are useful for marketers who seek to aim their products or services at specific sales targets. For example, the 12- to 17-year-old population is a favorite target of those marketing soft drinks and phonograph records. Several of the age groups are also associated with lifestyle stages a person passes through—such as the preschoolers (0–5 years), teen-agers (12–17 years), and young adults (18–24 years)—which are used in the formulation of marketing strategy.

POPULATION PER SQUARE MILE. (See Density.)

RETAIL SALES. All net sales (minus refunds and allowances for returns) of establishments engaged primarily in retail trade. Retail sales by such nonretailers as wholesalers and service establishments are not counted.

Although retail sales are frequently used to gauge the purchasing power of the residents in a market, they are only an approximation because the market's volume may be affected by the movement of shoppers to and from adjacent areas. They are actually a measure of the drawing power of local retail establishments.

The Total Retail Sales figure includes sales of store types not listed in the *Data Service*. Thus the arithmetic difference between Total Retail Sales and the aggregate sales of the 9 major store types represents sales of "All Other Stores." The "All Other Stores" category includes liquor, sporting goods, book, stationery, jewelry, hobby and toy, photographic, and gift stores, as well as nonstore retailers.

STANDARD INDUSTRIAL CLASSIFICATION (SIC). Federal government censuses classify individual business establishments by the type of primary activity in which they are engaged. Retail outlets are classified as two-digit major groups, such as General Merchandise Stores (SIC 53); three-digit subgroups, such as Department Stores (SIC 531); and four-digit detailed industry groups, such as Mail-Order Houses (SIC 5961).

STANDARD METROPOLITAN STATISTICAL AREA (MSA). (See Metropolitan Statistical Area)

SUPERMARKETS. Supermarket sales are listed as a component of total Food Store sales because this type of outlet dominates that field. Although the Census Bureau's retail censuses provide no data for supermarkets per se, S&MM's supermarket category is closely related to the bureau's Grocery Stores subgroup (SIC 541). Using the information provided for counties with more than 500 establishments in the *Census of Retail Trade*, S&MM employs the ratio between grocery store sales and total food store sales to calculate supermarket sales. During the intercensal years, S&MM makes its calculations based upon the rates of change reported for total food store sales and grocery store sales in the bureau's *Monthly Retail Trade Report*.

TELEVISION MARKET. The *Data Service*'s TV markets are ARBITRON's Areas of Dominant Influence (ADIs). ARBITRON studies each county for its measurable viewing patterns. The hours of viewing accorded each TV station whose signal reaches the county are totalled; then each station's percentage share of total viewing hours is calculated. The market of origin of the TV stations with the largest share of viewing hours becomes the ADI name for that market, and all counties whose largest viewing share is given to stations of that same market of origin are grouped within the ADI. (For its purposes, ARBITRON splits certain counties, treating each portion as if it were a separate county.) Each county (or portion), is allocated exclusively to a single ADI; thus overlap is eliminated. All of the area of the United States is covered except for Hawaii and Alaska.

RETAIL SALES ADDENDUM

RETAIL STORE GROUPS

The retail store groups that appear in the **Survey of Buying Power Data Service** follow the U.S. Standard Industrial Classification (SIC), which provides for up to two levels of subclasses within the groups; some of these subclasses are subdivided further by the Bureau of the Census. Data for these finer components, listed below, are maintained by Market Statistics (212-986-4800).

SIC Code	Components
54	**Food Stores**
541	Grocery stores
5422	Freezer and locker meat provisioners
5423 pt.	Meat markets
5423 pt.	Seafood markets
543	Fruit stores, vegetable markets
544	Candy, nut, and confectionery stores
545	Dairy products stores
5462	Retail bakeries (baking and selling)
5463	Retail bakeries (selling only)
549	Miscellaneous food stores
58	**Eating And Drinking Places**
5812 pt.	Restaurants, lunchrooms
5812 pt.	Social caterers
5812 pt.	Cafeterias
5812 pt.	Refreshment places
5812 pt.	Contract feeding
5812 pt.	Ice cream and frozen custard stands
5813	Drinking places
53	**General Merchandise Stores**
531	Department stores
533	Variety stores
539	Miscellaneous general merchandise stores
56	**Apparel And Accessories Stores**
561	Men's and boys' clothing and furnishings stores
562	Women's ready-to-wear stores
563 pt.	Millinery stores
563 pt.	Corset and lingerie shops
563 pt.	Other women's accessories and specialty stores
564	Children's and infants' wear stores
565	Family clothing stores
566 pt.	Men's shoe stores
566 pt.	Women's shoe stores
566 pt.	Children's and juveniles' shoe stores
566 pt.	Family shoe stores
568	Furriers and fur shops
569	Miscellaneous apparel and accessory stores
57	**Furniture/Home Furnishings/Appliance Stores**
5712	Furniture stores
5713	Floor covering stores
5714	Drapery, curtain, and upholstery stores
5719	Miscellaneous home furnishing stores
572	Household appliance stores
5732	Radio and TV stores
5733 pt.	Record shops
5733 pt.	Musical instruments stores
55 pt.	**Automotive Dealers**
5511 pt.	Domestic car franchise only
5511 pt.	Imported car franchise only
5511 pt.	Domestic and imported car franchises
552	Used car dealers
553 pt.	Tire, battery, and accessory dealers
553 pt.	Other auto and home supply stores
555	Boat dealers
556	Recreational and utility trailer dealers
557	Motorcycle dealers
559	Automotive dealers not elsewhere classified
	Note: Mobile home dealers, who used to be part of this group, are now in the Buildings Materials and Hardware group.
554	**Gasoline Service Stations**
	Includes establishments primarily selling gasoline and automotive lubricants and garages that derive more than half of their receipts from selling those same products.
52	**Building Materials And Hardware Dealers**
521	Lumber and other building materials dealers
523	Paint, glass, and wallpaper stores
525	Hardware stores
526	Retail nurseries, lawn and garden supply stores
527	Mobile home dealers
591	**Drugstores**
591 pt.	Drugstores
591 pt.	Proprietary stores
	All Other Stores
	The several store types that are not among the **Data Service's** store groups include the following:
592	Liquor stores
593	Used-merchandise stores
5941 pt.	General line sporting goods stores
5941 pt.	Specialty line sporting goods stores
5942	Bookstores
5943	Stationery stores
5944	Jewelry stores
5945	Hobby, toy, and game shops
5946	Camera and photographic supply stores
5947	Gift, novelty, and souvenir shops
5948	Luggage and leather goods stores
5949	Sewing, needlework, and piece goods stores
5961	Mail-order houses
5962	Automatic merchandising machine operators
5963	Direct selling establishments
5982	Fuel and ice dealers, not elsewhere classified
5983	Fuel oil dealers
5984	Liquefied petroleum gas dealers
5992	Florists
5993	Cigar stores and stands
5994	News dealers and newsstands
5999	Miscellaneous stores not elsewhere classified

(continued)

1989 SURVEY OF BUYING POWER DATA SERVICE

MERCHANDISE LINE CATEGORIES

The merchandise lines that appear in the **Survey of Buying Power Data Service** are among those designated on the report forms of the Census of Retail Trade. Finer lines are designated within most of these broad lines where appropriate to the store type. Data for the detailed lines are maintained by Market Statistics (212-986-4800). They are listed here with the code numbers used by the Bureau of the Census.

Census Code	Components
100	**Groceries And Other Foods**
101	Meat, fish and poultry
102	Produce
103	Frozen foods
104	Dairy products and related foods
105	Bakery products, except frozen
107	Delicatessen items
108	All other foods
160	**Drugs, Health Aids and Beauty Aids**
161	Prescriptions
162	Nonprescription medicines
163	Health aids
164	Cosmetics
165	Other hygiene needs
300	**Major Household Appliances**
301	Kitchen appliances
302	Laundry appliances
303	Other major household appliances
320	**Televisions and Video Recorders**
330	**Audio Equipment, Musical Instruments And Supplies**
331	Audio equipment, components, parts, and accessories
335	Records and tapes
337	Musical instruments, sheet music and related items
340	**Furniture And Sleep Equipment**
342	Living room, dining room, and bedroom furniture
343	Sleep furniture and equipment
344	All other furniture including outdoor, kitchen and office furniture
200	**Men's And Boys' Clothing**
201	Boys', young men's, and students' clothing and accessories
202	Men's overcoats, topcoats, raincoats, and outer jackets
203	Men's suits and formal wear
204	Men's sport coats and blazers
205	Men's jeans and casual slacks
206	Men's career apparel and work clothes
207	Men's shirts
208	Men's sweaters
209	Men's hosiery, pajamas, robes, and underwear
211	Men's sportswear
212	Men's accessories
220	**Women's And Girls' Clothing**
221	Infants' and toddlers' apparel and accessories
222	Women's, misses', and juniors' furs and fur garments
223	Women's, misses', and juniors' dresses
224	Women's, misses', and juniors' tailored coats, jackets and rainwear
225	Women's, misses', and juniors' separates and coordinates
228	Women's, misses', and juniors' active sportswear
229	Women's hosiery
231	Women's bras, girdles and foundations
232	Women's, misses', and juniors' lingerie, sleepwear, and loungewear
233	Women's hats, hairpieces, and trimmings
234	Women's handbags and small leather goods
235	Other apparel
260	**Footwear**
261	Men's and boys' footwear
262	Women's and girls' footwear
263	Children's footwear
264	Footwear accessories
	Note: Infants and toddlers footwear not included
858	Home computers and Calculators

1989 SURVEY OF BUYING POWER DATA SERVICE

TELEVISION MARKET ADDENDUM

The Television Markets for which data are shown in Sections 16–21 are the Areas of Dominant Influence (ADIs) delineated by the Arbitron Ratings Company for the 1989-90 TV year, covering all of the United States except Alaska and Hawaii. The counties and (in a few areas) portions of counties that make up each market are listed below.

ABILENE - SWEETWATER, TEX.— Brown, Callahan, Coke, Coleman, Eastland, Fisher, Haskell, Jones, Mitchell, Nolan, Runnels, Scurry, Shackelford, Stephens, Stonewall, Taylor.

ALBANY, GA.— Atkinson, Baker, Ben Hill, Berrien, Calhoun, Coffee, Colquitt, Cook, Crisp, Dougherty, Irwin, Lanier, Lee, Miller, Mitchell, Telfair, Terrell, Tift, Turner, Worth.

ALBANY - SCHENECTADY - TROY, N.Y.— MASS.: Berkshire; N.Y.: Albany, Columbia, Fulton, Greene, Hamilton, Montgomery, Rensselaer, Saratoga, Schenectady, Schoharie, Warren, Washington; VT.: Bennington.

ALBUQUERQUE, N.M.— ARIZ.: Apache (northern portion); COLO.: Alamosa, Archuleta, Conejos, Costilla, Montezuma, Rio Grande; N.M.: Bernalillo, Catron, Chaves, Cibola, Colfax, De Baca, Eddy, Grant, Guadalupe, Harding, Lea (northern portion), Lincoln, Los Alamos, Luna, McKinley, Mora, Otero, Rio Arriba, Sandoval, San Juan, San Miguel, Santa Fe, Sierra, Socorro, Taos, Torrance, Valencia.

ALEXANDRIA, LA.— Avoyelles, Grant, Rapides, Vernon.

ALPENA, MICH.— Alcona, Alpena.

AMARILLO, TEX.— N.M.: Curry, Quay, Roosevelt, Union; OKLA.: Cimarron, Texas; TEX.: Armstrong, Briscoe, Carson, Castro, Childress, Collingsworth, Cottle, Dallam, Deaf Smith, Donley, Gray, Hall, Hansford, Hartley, Hemphill, Hutchinson, Lipscomb, Moore, Motley, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, Wheeler.

ANNISTON, ALA.— Calhoun.

ARDMORE - ADA, OKLA.— Atoka, Bryan, Carter, Choctaw, Coal, Johnston, Love, Marshall, Pontotoc, Pushmataha.

ATLANTA, GA.— ALA.: Cleburne, Randolph; GA.: Banks, Barrow, Bartow, Butts, Carroll, Cherokee, Clarke, Clayton, Cobb, Coweta, Dawson, De Kalb, Douglas, Fayette, Floyd, Forsyth, Fulton, Gilmer, Gordon, Greene, Gwinnett, Habersham, Hall, Haralson, Heard, Henry, Jackson, Jasper, Lamar, Lumpkin, Meriwether, Morgan, Newton, Oconee, Oglethorpe, Paulding, Pickens, Pike, Polk, Putnam, Rabun, Rockdale, Spalding, Towns, Troup, Union, Upson, Walton, White; N.C.: Clay.

AUGUSTA, GA.— Burke, Columbia, Emanuel, Glascock, Hancock, Jefferson, Jenkins, Lincoln, McDuffie, Richmond, Taliaferro, Warren, Wilkes; S.C.: Aiken, Allendale, Bamberg, Barnwell, Edgefield, McCormick.

AUSTIN, TEX.— Bastrop, Blanco, Burnet, Caldwell, Fayette, Gillespie, Hays, Lee, Llano, Mason, Travis, Williamson.

BAKERSFIELD, CALIF.— Kern (western portion).

BALTIMORE, MD.— Anne Arundel, Baltimore, Baltimore city, Caroline, Carroll, Cecil, Dorchester, Harford, Howard, Kent, Queen Anne's, Talbot.

BANGOR, MAINE— Hancock, Penobscot, Piscataquis, Somerset, Waldo, Washington.

BATON ROUGE, LA.— Ascension, Assumption, East Baton Rouge, East Feliciana, Iberville, Livingston, Pointe Coupee, St. Helena, St. Mary, West Baton Rouge, West Feliciana; MISS.: Amite, Wilkinson.

BEAUMONT - PORT ARTHUR, TEX.— Hardin, Jasper, Jefferson, Newton, Orange, Sabine, Tyler.

BEND, ORE.— Deschutes.

BILLINGS - HARDIN, MONT.— Big Horn, Carbon, Custer, Garfield, Golden Valley, Musselshell, Park, Petroleum, Powder River, Prairie, Rosebud, Stillwater, Sweet Grass, Treasure, Wheatland, Yellowstone; WYO.: Park.

BILOXI - GULFPORT - PASCAGOULA, MISS.— Harrison, Stone.

BINGHAMTON, N.Y.— Broome, Chenango, Delaware, Tioga; PA.: Bradford.

BIRMINGHAM, ALA.— Bibb, Blount, Cherokee, Chilton, Clay, Coosa, Cullman, Etowah, Fayette, Greene, Hale, Jefferson, Marion, St. Clair, Shelby, Talladega, Walker, Winston.

BLUEFIELD - BECKLEY - OAK HILL, W.VA.— VA.: Bland, Tazewell; W.VA.: Fayette, Greenbrier, McDowell, Mercer, Monroe, Raleigh, Summers, Wyoming.

BOISE, IDA.— Ada, Adams, Blaine, Boise, Camas, Canyon, Elmore, Gem, Owyhee, Payette, Valley, Washington; ORE.: Grant, Malheur.

BOSTON, MASS.— Barnstable, Essex, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, Worcester; N.H.: Belknap, Cheshire, Hillsborough, Merrimack, Rockingham, Strafford, Sullivan; VT.: Windham.

BOWLING GREEN, KY.— Adair, Edmonson, Metcalfe, Warren.

BRISTOL - KINGSPORT - JOHNSON CITY, TENN.— KY.: Knott, Letcher; TENN.: Carter, Greene, Hawkins, Johnson, Sullivan, Unicoi, Washington; VA.: Bristol city, Buchanan, Dickenson, Lee, Norton city, Russell, Scott, Smyth, Washington, Wise.

BUFFALO, N.Y.— Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans, Wyoming; PA.: McKean, Potter.

BURLINGTON - PLATTSBURGH, VT.— N.H.: Grafton; N.Y.: Clinton, Essex, Franklin; VT.: Addison, Caledonia, Chittenden, Essex, Franklin, Grand Isle, Lamoille, Orange, Orleans, Rutland, Washington, Windsor.

BUTTE, MONT.— Beaverhead, Broadwater, Deer Lodge, Gallatin, Jefferson, Madison, Powell, Silver Bow.

CASPER - RIVERTON, WYO.— Converse, Fremont, Natrona.

CEDAR RAPIDS - WATERLOO - DUBUQUE, IOWA— Allamakee, Benton, Black Hawk, Bremer, Buchanan, Butler, Chickasaw, Clayton, Delaware, Dubuque, Fayette, Grundy, Iowa, Johnson, Jones, Keokuk, Linn, Tama, Washington, Winneshiek; WISC.: Grant.

CHARLESTON, S.C.— Berkeley, Charleston, Colleton, Dorchester, Georgetown, Williamsburg.

CHARLESTON - HUNTINGTON, W.VA.— KY.: Boyd, Carter, Elliott, Floyd, Greenup, Johnson, Lawrence, Lewis, Magoffin, Martin, Morgan, Pike; OHIO: Athens, Gallia, Jackson, Lawrence, Meigs, Scioto, Vinton, Washington; W.VA.: Boone, Cabell, Calhoun, Clay, Jackson, Kanawha, Lincoln, Logan, Mason, Mingo, Nicholas, Putnam, Roane, Wayne, Webster, Wirt.

CHARLOTTE, N.C.— Alexander, Anson, Ashe, Avery, Burke, Cabarrus, Caldwell, Catawba, Cleveland, Gaston, Iredell, Lincoln, Mecklenburg, Richmond, Rowan, Stanly, Union, Watauga; S.C.: Chester, Chesterfield, Lancaster, York.

CHARLOTTESVILLE, VA.— Albemarle, Charlottesville city.

CHATTANOOGA, TENN.— GA.: Catoosa, Chattooga, Dade, Fannin, Murray, Walker, Whitfield; N.C.: Cherokee; TENN.: Bledsoe, Bradley, Grundy, Hamilton, McMinn, Marion, Meigs, Polk, Rhea, Sequatchie.

CHEYENNE - SCOTTSBLUFF, WYO.— NEB.: Scotts Bluff; WYO.: Laramie.

CHICAGO, ILL.— Cook, De Kalb, Du Page, Grundy, Iroquois, Kane, Kankakee, Kendall, Lake, La Salle, Livingston, McHenry, Will; IND.: Jasper, Lake, La Porte, Newton, Porter.

CHICO - REDDING, CALIF.— Butte, Glenn, Shasta, Tehama, Trinity.

CINCINNATI, OHIO— IND.: Dearborn, Franklin, Ohio, Ripley, Switzerland, Union; KY.: Boone, Bracken, Campbell, Gallatin, Grant, Kenton, Mason, Owen, Pendleton; OHIO: Adams, Brown, Butler, Clermont, Clinton, Hamilton, Highland, Warren.

CLARKSBURG - WESTON, W.VA.— Barbour, Braxton, Doddridge, Gilmer, Harrison, Lewis, Marion, Randolph, Ritchie, Taylor, Tucker, Upshur.

CLEVELAND, OHIO— Ashland, Ashtabula, Carroll, Cuyahoga, Erie, Geauga, Holmes, Huron, Lake, Lorain, Medina, Portage, Richland, Stark, Summit, Tuscarawas, Wayne.

COLORADO SPRINGS - PUEBLO, COLO.— Baca, Bent, Cheyenne, Crowley, Custer, El Paso, Fremont, Huerfano, Kiowa, Las Animas, Otero, Pueblo, Saguache.

COLUMBIA, S.C.— Calhoun, Clarendon, Fairfield, Kershaw, Lee, Lexington, Newberry, Orangeburg, Richland, Saluda, Sumter.

COLUMBIA - JEFFERSON CITY, MO.— Audrain, Boone, Callaway, Chariton, Cole, Cooper, Howard, Maries, Miller, Moniteau, Morgan, Osage, Randolph.

COLUMBUS, GA.— ALA.: Barbour, Chambers, Lee, Russell; GA.: Chattahoochee, Clay, Harris, Macon, Marion, Muscogee, Quitman, Randolph, Schley, Stewart, Sumter, Talbot, Taylor, Webster.

COLUMBUS - TUPELO, MISS.— ALA.: Lamar, Pickens; MISS.: Calhoun, Chickasaw, Choctaw, Clay, Itawamba, Lee, Lowndes, Monroe, Montgomery, Noxubee, Oktibbeha, Pontotoc, Prentiss, Tishomingo, Webster, Winston, Yalobusha.

COLUMBUS, OHIO— Coshocton, Crawford, Delaware, Fairfield, Fayette, Franklin, Hardin, Hocking, Knox, Licking, Madison, Marion, Morgan, Morrow, Perry, Pickaway, Pike, Ross, Union.

CORPUS CHRISTI, TEX.— Aransas, Bee, Brooks, Duval, Jim Hogg, Jim Wells, Kenedy, Kleberg, Live Oak, Nueces, Refugio, San Patricio.

DALLAS - FT. WORTH, TEX.— Anderson, Bosque, Collin, Comanche, Cooke, Dallas, Delta, Denton, Ellis, Erath, Fannin, Freestone, Grayson, Hamilton, Henderson, Hill, Hood, Hopkins, Hunt, Johnson, Kaufman, Lamar, Limestone, Navarro, Palo Pinto, Parker, Rains, Rockwall, Somervell, Tarrant, Van Zandt, Wise, Wood.

DAVENPORT - ROCK ISLAND - MOLINE, IOWA— ILL.: Bureau, Carroll, Henderson, Henry, Jo Daviess, Knox, Mercer, Rock Island, Warren, Whiteside; IOWA:

© COPYRIGHT, SALES & MARKETING MANAGEMENT MAGAZINE, 1989.
1989 SURVEY OF BUYING POWER DATA SERVICE

Cedar, Clinton, Des Moines, Henry, Jackson, Louisa, Muscatine, Scott.

DAYTON, OHIO— IND.: Wayne; OHIO: Auglaize, Champaign, Clark, Darke, Greene, Logan, Mercer, Miami, Montgomery, Preble, Shelby.

DENVER, COLO.— Adams, Arapahoe, Boulder, Chaffee, Clear Creek, Denver, Douglas, Eagle, Elbert, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Jackson, Jefferson, Kit Carson, Lake, Larimer, Lincoln, Logan, Mineral, Moffat, Morgan, Park, Phillips, Pitkin, Prowers, Rio Blanco, Routt, San Juan, Sedgwick, Summit, Teller, Washington, Weld, Yuma, NEB.: Box Butte, Cheyenne, Dawes, Deuel, Kimball; WYO.: Albany, Campbell, Carbon, Goshen, Johnson, Niobrara, Platte.

DES MOINES, IOWA— Adair, Appanoose, Audubon, Boone, Calhoun, Carroll, Clarke, Dallas, Decatur, Franklin, Greene, Guthrie, Hamilton, Hardin, Humboldt, Jasper, Lucas, Madison, Mahaska, Marion, Marshall, Monroe, Pocahontas, Polk, Poweshiek, Ringgold, Story, Union, Wapello, Warren, Wayne, Webster, Wright; MO.: Mercer.

DETROIT, MICH.— Lapeer, Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw, Wayne.

DOTHAN, ALA.— Coffee, Dale, Geneva, Henry, Houston; FLA.: Holmes, Jackson; GA.: Early.

DULUTH - SUPERIOR, MINN.— MICH.: Gogebic; MINN.: Aitkin, Carlton, Cook, Itasca, Koochiching, Lake, St. Louis; WISC.: Ashland, Bayfield, Douglas, Iron, Sawyer, Washburn.

EL CENTRO - YUMA, CALIF.— ARIZ.: Yuma; CALIF.: Imperial.

EL PASO, TEX.— N.M.: Dona Ana; TEX.: Culberson, El Paso, Hudspeth.

ELMIRA, N.Y.— Chemung, Steuben; PA.: Tioga.

ERIE, PA.— Crawford, Erie, Forest, Warren.

EUGENE, ORE.— Benton, Coos, Douglas, Lane.

EUREKA, CALIF.— Del Norte, Humboldt.

EVANSVILLE, IND.— ILL.: Edwards, Wabash, Wayne, White; IND.: Dubois, Gibson, Perry, Pike, Posey, Spencer, Vanderburgh, Warrick; KY.: Daviess, Hancock, Henderson, Hopkins, McLean, Muhlenberg, Ohio, Union, Webster.

FARGO, N.D.— MINN.: Becker, Clay, Clearwater, Kittson, Lake of the Woods, Mahnomen, Marshall, Norman, Otter Tail, Pennington, Polk, Red Lake, Roseau, Wilkin; N.D.: Barnes, Benson, Cass, Cavalier, Dickey, Eddy, Foster, Grand Forks, Griggs, La Moure, Nelson, Pembina, Ramsey, Ransom, Richland, Sargent, Steele, Stutsman, Towner, Traill, Walsh.

FLAGSTAFF, ARIZ.— Coconino.

FLINT - SAGINAW - BAY CITY, MICH.— Arenac, Bay, Clare, Genesee, Gladwin, Gratiot, Huron, Iosco, Isabella, Midland, Ogemaw, Saginaw, Sanilac, Shiawassee, Tuscola.

FLORENCE, S.C.— Darlington, Dillon, Florence, Horry, Marion, Marlboro.

FT. MYERS - NAPLES, FLA.— Charlotte, Collier, Glades, Hendry, Lee.

FT. SMITH, ARK.— Benton, Crawford, Franklin, Logan, Madison, Polk, Scott, Sebastian, Washington; OKLA.: Le Flore, Sequoyah.

FT. WAYNE, IND.— Adams, Allen, De Kalb, Huntington, Jay, Noble, Steuben, Wabash, Wells, Whitley; OHIO: Paulding, Van Wert.

FRESNO - VISALIA, CALIF.— Fresno, Kings, Madera, Mariposa, Merced, Tulare.

GAINESVILLE, FLA.— Alachua, Dixie, Gilchrist, Levy.

GRAND JUNCTION - DURANGO, COLO.— Delta, La Plata, Mesa, Montrose, Ouray, San Miguel.

GRAND RAPIDS - KALAMAZOO - BATTLE CREEK, MICH.— Allegan, Barry, Branch, Calhoun, Ionia, Kalamazoo, Kent, Mecosta, Montcalm, Muskegon, Newaygo, Oceana, Ottawa, St. Joseph, Van Buren.

GREAT FALLS, MONT.— Blaine, Cascade, Chouteau, Fergus, Glacier, Hill, Judith Basin, Liberty, Meagher, Phillips, Pondera, Teton, Toole, Valley.

GREEN BAY - APPLETON, WISC.— MICH.: Delta, Dickinson, Menominee, Schoolcraft; WISC.: Brown, Calumet, Door, Fond du Lac, Green Lake, Kewaunee, Manitowoc, Marinette, Menominee, Oconto, Outagamie, Shawano, Waupaca, Waushara, Winnebago.

GREENSBORO - WINSTON-SALEM - HIGH POINT, N.C.— Alamance, Alleghany, Caswell, Davidson, Davie, Forsyth, Guilford, Montgomery, Randolph, Rockingham, Stokes, Surry, Wilkes, Yadkin; VA.: Galax city, Patrick.

GREENVILLE - NEW BERN - WASHINGTON, N.C.— Beaufort, Bertie, Carteret, Craven, Duplin, Greene, Hyde, Jones, Lenoir, Martin, Onslow, Pamlico, Pitt, Tyrrell, Washington.

GREENVILLE - SPARTANBURG - ASHEVILLE, S.C.— GA.: Elbert, Franklin, Hart, Madison, Stephens; N.C.: Buncombe, Graham, Haywood, Henderson, Jackson, McDowell, Macon, Madison, Mitchell, Polk, Rutherford, Swain, Transylvania, Yancey; S.C.: Abbeville, Anderson, Cherokee, Greenville, Greenwood, Laurens, Oconee, Pickens, Spartanburg, Union.

1989 SURVEY OF BUYING POWER DATA SERVICE

SECTION 5
Population By Age And Sex For Metropolitan Markets And All Counties

0-5 Years
6-11 Years
12-17 Years
18-24 Years
25-34 Years
35-44 Years
45-54 Years
55-64 Years
65 And Over
Median Age By Sex

EXPLANATION OF TERMS

An explanation of terms used in the **Survey Of Buying Power Data Service** will be found in the Introductory Section starting on page A-5.

To order additional copies of the 1989 DATA SERVICE
please call toll-free 1-800-825-8508.
Ask for Product #59800.

SYMBOLS USED IN TABLES

□ Metropolitan county of another state's metropolitan area. For area name, see page facing state map in Section 1.

1989 SURVEY OF BUYING POWER DATA SERVICE

SECTION 6
Households By Age Of Householder And By Number Of Persons For Metropolitan Markets And All Counties

By Age Of Householder
Under 25 Years
25-34 Years
35-44 Years
45-54 Years
55-64 Years
65 And Over
By Number Of Persons: 1, 2, 3, 4, 5, 6 Or More
Average Household Size

EXPLANATION OF TERMS

An explanation of terms used in the **Survey Of Buying Power Data Service** will be found in the Introductory Section starting on page A-5.

To order additional copies of the 1989 DATA SERVICE
please call toll-free 1-800-825-8508.
Ask for Product #59800.

SYMBOLS USED IN TABLES

□ Metropolitan county of another state's metropolitan area. For area name, see page facing state map in Section 1.
